INT. ENGINEERING

28

BUZZING with activity... CREWMEN working to undo the  
damage that Kelby caused. T'Pol ENTERS, moves over to  
Trip, who's at a console..

T'POL  
The Captain asked me to offer my  
assistance.

TRIP  
Great... you can run through these  
diagnostics... see if you can find  
anything that isn't fried.

She takes over the console. Trip moves to an open panel  
nearby, starts replacing circuitry.

TRIP  
Do you really think they're coming  
after us?

T'POL

It's likely. The transmissions sent by the Orion females suggest that Harrad-Sar's ship is getting closer.

Trip shakes his head.

TRIP

You know, I keep thinking back to our first mission... when we met the Suliban... I was so damn naive. I actually thought it would be the last time we'd have to fight someone.

CREWMAN #1 (O.S.)

Hey --

The SHOUTING causes Trip to spin around. Not far away, two CREWMEN are locked in a shoving match --

CREWMAN #2

I said leave it alone --

CREWMAN #1

Get your hands off me --

Trip hurries over and gets in between the struggling crewmen, wrenching them apart.

TRIP

Knock it off -- that's an order --

The Crewmen back away, eyeing each other.

TRIP

Start up again, and you'll both be outta here -- understand?

They nod, still angry.

TRIP

(to Crewman #1)  
Help Masarro with the injectors...  
(beat)  
Now --

Crewman #1 skulks off.

TRIP

(to Crewman #2)  
Get back to work...
